The following is a quotation of the appropriate paragraphs of 35 U.S.C. 102 that form the basis for the rejections under this section made in this Office action:

A person shall be entitled to a patent unless –

(b) the invention was patented or described in a printed publication in this or a foreign country or in public use or on sale in this country, more than one year prior to the date of application for patent in the United States.

Claims 2 and 5 are rejected under 35 U.S.C. 102(b) as being anticipated by JP '119 abstract.

JP '119 abstract discloses methods for the production of polypropylene films wherein the film is passed over calendar rolls at a temperature above the melting point of the resin. It is assumed that the calendar rolls of the reference are rotating at approximately the same rate since the reference does not specify otherwise.

Therefore the reference anticipates the rejected claims.

Claims 9-11 and 13 are rejected under 35 U.S.C. 102(b) as being anticipated by Isozaki et al.

Isozaki et al disclose processes for producing polyethylene films with c-axis/MD orientation coefficients of 0.78 to 0.93. These processes are taught as comprising a step of passing the film between pairs of nip rolls.

Therefore the reference anticipates the rejected claims.

Claims 12 and 14-17 are objected to as being dependent upon a rejected base claim, but would be allowable if rewritten in independent form including all of the limitations of the base claim and any intervening claims.

Claims 1, 3, 4 and 6-8 are allowed.
